PARTNERSHIP FOR NEW YORK CITY

Employee Survey Results

MARCH 2022
ABOUT MORNING CONSULT

MORNING CONSULT IS A GLOBAL DECISION INTELLIGENCE COMPANY CHANGING HOW MODERN LEADERS MAKE SMARTER, FASTER, BETTER DECISIONS.
KEY TAKEAWAYS

Safety, homelessness, and mental illness rank as top issues for New York City’s private sector employees. They are resisting return to the office until something is done to address them, particularly on public transit.

Most employees are uncertain about the city’s future but remain committed to NYC and want to be part of its recovery.

Employees feel strongly that their company should hold public officials accountable for taking action to fight crime and restore quality of life in the city.

Employees also say businesses and employees can contribute to the city’s recovery by helping small businesses recover, increasing community engagement, and by rethinking the future of work (hybrid work models and incentives to be in the office).
This poll was conducted between February 17-March 11, 2022, among a sample of 9,386 adults working in New York City offices. The interviews were conducted online. Results from the full survey have a margin of error of plus or minus 1 percentage point.
Consumer confidence in NYC has trended downward the past 12 months

Showing the Index for Consumer Sentiment (ICS) for the 10 largest metropolitan areas in the United States (week of 3/13/22).

Reading this data: Higher numbers indicate greater consumer confidence. In order to gauge consumer sentiment, Morning Consult asks five questions relating to personal finances and business conditions in the country. The results from those five questions are then inputted into these three indices: The ICS is the overall measurement based on the results of all five questions.
For a national context, consumer sentiment in New York City is behind other major metropolitan areas like San Francisco, Los Angeles, and the DMV.

Showing the Index for Consumer Sentiment (ICS) for the 20 largest metropolitan areas in the United States (week of 3/13/22).
While many employees surveyed are optimistic about the future of the city, 62% say they are pessimistic or unsure.

Generally speaking, would you say that you are optimistic, pessimistic, or unsure that the city is on the road to recovery?

- **38%** Optimistic
- **28%** Pessimistic
- **34%** Unsure
The Challenge: New Yorkers feel not enough is being done.

- 84% Of New York City-area employees say conditions in the city have worsened over the past two years.
- 94% Say not enough is being done to address homelessness and mental illness in the city.
- 74% Of commuters using public transit say safety on transit has gotten worse since the beginning of the pandemic.
- 40% Of employees who live in Manhattan say they are thinking about moving away from NYC.
- 48% Of employees in other boroughs say the same.
The majority of NYC-area commuters say homelessness and safety have gotten worse

If you commute to work by public transit, how do conditions of the following on public transit today compare to before the pandemic (prior to March 2020)? (N=4,427)

When asked to choose, commuters say safety is most important to tackle

If you commute to work by public transit, which of the following is MOST important to address on public transit in New York City in 2022? (N=4,427)

- Safety: 61%
- Homelessness: 15%
- Reliability: 13%
- Cleanliness: 4%
- Cost: 3%
- Police presence: 3%
- Other: 1%

“In order to get people to return to the office, safety needs to be the number 1 priority. I need to feel safe commuting. I need to feel safe walking. I need to overall feel safe about my environment and general surroundings.”

- Employee living and working in Manhattan
Despite challenges, most say they are committed to NYC and want to be part of the city’s recovery.
WHERE CAN BUSINESS HELP?
Theme #1: Accountability & Engagement

Employees say business can help hold politicians and institutions to account for the city’s recovery

“Hold city officials accountable for actually making quality of life improvements.”

“Support police but demand they perform too.”

“Push politicians to take back the city.”

“Make sure employees are educated on issues, candidates, and that they vote.”

In one sentence or so, what could our business and employees do to contribute to the city’s recovery?
Theme #2: Safety

Personal safety was the most cited roadblock to the city's recovery

“Getting the city's subways safer, cleaner and more reliable would greatly influence people to come into the offices again and use public transportation. If fundraising existed to help get the city's subways in more acceptable working order, our company could contribute towards that.”

“Push for increased police presence on subways, public transportation and in local neighborhoods. Crime is skyrocketing around the city, and it is increasingly feeling unsafe to leave your home.”

“Partner with the new mayor and governor to give them support/cover to tackle issues like crime, homelessness, transportation.”

In one sentence or so, what could our business and employees do to contribute to the city’s recovery?
Theme #3: Homelessness and Mental Health

Homelessness and the dangers posed by mentally ill people on public transit and the Manhattan streets is the personal safety issue that most concerns employees.

Use the power of the firm to voice our opinion regarding the state of the city, the level of crime, homelessness and mental illness and to hopefully influence policy and other decisions regarding the future of the city.

Enhance resources for the homeless or mentally ill that are creating uncomfortable or unsafe environments in the subways and stations for both themselves and others around them.

Contribute financially, materially and in the form of legal pro bono work to organizations that support - and do advocacy/policy work with and on behalf of - the city’s most vulnerable populations.

Our business could get involved in charities that aid the homeless and are working to address the mental health problems of homeless in the city.

In one sentence or so, what could our business and employees do to contribute to the city’s recovery?
Theme #4: Small Business Recovery

Employees say their companies can partner with small businesses to help with recovery

“Local small businesses have suffered tremendously during this time. Come up with a company plan to pick a local business each week and actively promote and encourage employees within office to do what they can to try and support the business once or twice during that week.

“Support small businesses as much as we can. Through using them to order meals or inviting small boutiques to sell their items in the cafeteria. I think we used to do this, and it was helpful to see the types of stores that were around.

“Our business can make an investment to spend money at local businesses around the office to entice our colleagues to come back - i.e., offer free/discounted meals in the office that are purchased from local establishments.

“Support small businesses around the office (catering, cleaning, shopping) to encourage more people back into the city and help with unemployment.

In one sentence or so, what could our business and employees do to contribute to the city’s recovery?
Theme #5: Return to the Office

Employees support hybrid work models, with flexibility to work remotely, but also want to get back to the office when the city is safe.

“Businesses that want to recover should permit employees to work remotely 1-2 days a week, so they don’t lose employees to businesses that permit flexible work schedules. Hybrid work arrangements enrich the neighborhoods that employees live in and promote good mental health and positive work-life balance.”

“Create incentives (monetary or otherwise) to get people to come into the office in order to show it is safe and beneficial to work collaboratively.”

“Remote work has laid bare that NYC is unlivable relative to other places.

Put pressure on government to enforce the rule of law.”

“Stop trying to pretend we can revert to the world as it was in 2019. The nature of work and office buildings has permanently changed.”

In one sentence or so, what could our business and employees do to contribute to the city’s recovery?

Create incentives (monetary or otherwise) to get people to come into the office in order to show it is safe and beneficial to work collaboratively.
A plurality of employee respondents say they live in Manhattan

Where do you live?
